Public IP
for Load Balancer
Service

AKS
Load Balancer

Description

1. **Users:** The users will be pointing to the url <http://52.184.212.173>
2. **Public IP:** The Public IP is created for using the Load Balancer service, through the AKS Load Balancer.
3. **AKS Load Balancer:** The AKS Load Balancer is used to route traffic to multiple services within the AKS Cluster, including the Nodes or Worker machines, where the Pods (A Pod is a group of one or more containers) are deployed.
4. **Load Balancer Service:** The Load Balancer service is necessary for enabling external access to the Pods in Kubernetes.
